

Internet Information Services – Edit Culture & UI Culture Resolve Incorrect Date/Time in Dashboard

Internet Information Services – Edit Culture & UI Culture

- If you notice that dates displayed in the AIMS Dashboard or Job List is in the format DD/MM/YYYY, perform this step to correct it to MM/DD/YYYY.
- Making the following changes will set US standards to date formats within AIMS.
 - Note: During a typical installation you will perform this task after you have run the AIMS installer for the last time.
- Goto Windows Control Panel, System & Security, and finally Administrative Tools.
- Double click on Internet Information Services (IIS) Manager.
- Click on .NET Globalization.

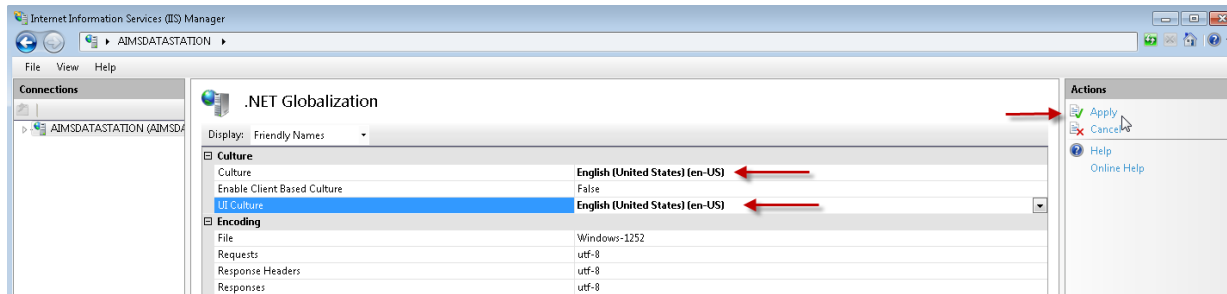

- Select “Invariant Language [Invariant Country] for Culture and UI Culture.
 - This will give you a pull-down menu.
 - Find “English (United States)(en-US) and select for both.

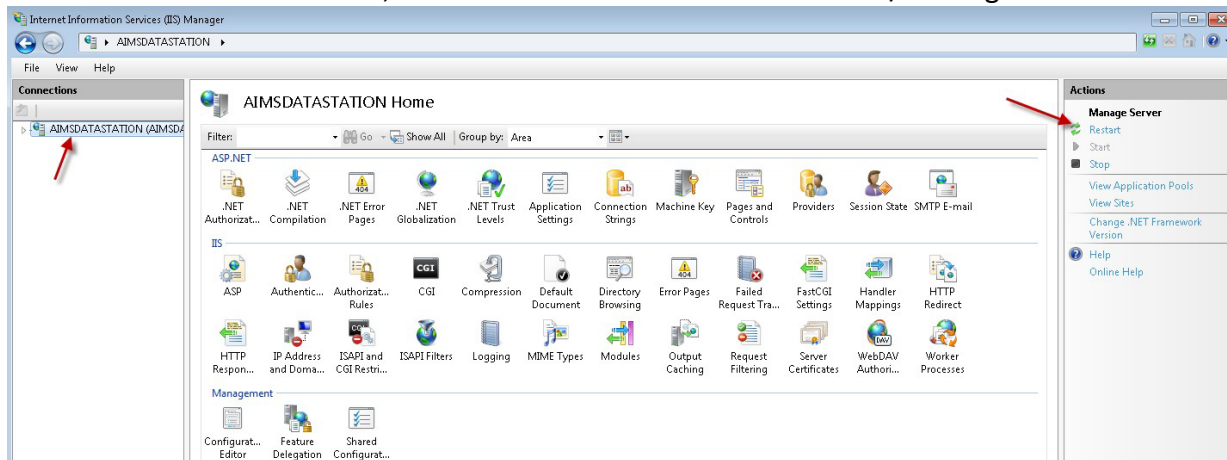

- Click “Apply” under the Actions window

Internet Information Services – Edit Culture & UI Culture Resolve Incorrect Date/Time in Dashboard

- Click on the IIS Server, then Click on “Restart” under Actions / Manage Server.

- Close this and other related windows you have opened.
